

Yesterday: Engineers sought for **technical solution** with appropriate Costs.

Today: Technical solutions are out, **financial management counts** only.

Never mind, despite the observed development we want to find an answer from professional engineers / Contractors with thinking in economic terms/savings, too.

How do you verify the **CONSTRUCTABILITY** of a Tunnel or a Gallery?

[S+DesignTunnelGallery.pdf](#)

Which international selection

criteria do you prefer for design or design review to validate the **CONSTRUCTABILITY** of a "Tunnel or Gallery"?

Which appropriate Design Manual do you propose?
